Press Release  
September 30, 2022

## *For immediate release*

National Molding Medical in Largo, Florida, a division of National Molding Dynaplas, announced today the completion and commissioning of an additional 4,200 square feet of Class 8 cleanroom for medical component molding. This is in addition to 3,600 square feet of Class 8 medical molding cleanroom space in which the company currently molds and fills diagnostic products. The new cleanroom will begin production for a major medical products company during October. A third cleanroom is planned by the company to support customer growth.

The company also announced the completion of a utility expansion project to support molding capacity in an additional 4,900 square feet of controlled environment that will be commissioned during Q4

Greg Fischer, VP Sales & Marketing of National Molding Dynaplas, stated “this expansion gives us the needed capacity to support the new customers who are looking to us to provide medical product molding services with our highly talented team in Largo. I am excited that we can support these medical product customers and meet their growing molding needs”

National Molding also announced the 2022 purchase of nine new injection molding presses of between 75 and 220 tons to expand capacity, and the installation of four new customer owned presses dedicated to a new customers diagnostic product line. With the new presses National Molding Medical now operates 60 presses of between 50 and 300 ton capacity in the Largo facility with room and utility support to add to the fleet.

### About National Molding Medical
